### Flaxo Weather Shield

FOR EXTERIOR WALLS & CIELINGS

Flaxen Paints is the paint of the future. We are dedicated to produce products and at the same time care for the welfare of our people and our environment. As the idea have been originally formulated from a previous business crafted in the UAE, Flaxen Paints would like to provide excellence service with quality and life changing innovations. Offering a wide range of premium quality products which is mercury and lead free, water based paints, odorless and environmentally friendly products. We are proud to offer and provide our customers with easy to use while being efficient. As a pioneer paint business in relation to a socially responsible brand, we want to make sure that our paint facilities follow the highest standard in safety and practice the best environmental protocols in our operations. We aim to be the first in the production of eco-friendly paints, proving our commitment to the environmental and public health. We also aim to be the first to produce and give the world it's air-cleaning paint therefore giving our consumer the power to fight air pollution. To learn more about Flaxen Paints, visit our website at [www.flaxenpaints.com](http://www.flaxenpaints.com)

Flaxen Paints introduces "Stone Paint" which will be pioneering in the country. It is an ideal choice for architectural exteriors as it provides texture, durability and exceptional colour fade resistance. It also provides a uniform finish that does not age that it can even last for 50 years, or streak and hides surface imperfections while it also feels and appears soft. Stone Paint is available in fine and coarse textures. Stone Paint Fine contain marble dust creating a fine stone-like finish. Stone Paint Coarse contains particles of graded quartz and has a coarse texture finish similar to cement bagging. Stone Paint is UV resistant, dirt resistant and with low odor. Stone Paint is easy to apply. As long as the surface is clean, it is self priming and can be applied directly over previously painted surface.
